- **First**, we are still working on the new specifications. We found some bugs in the software. As a result, we are working to resolve the situation.
- **In addition**, our engineers are making a new software for our product. We believe this new software will be more dependable. Also, the new software will be easier to use for our customers.
- **Furthermore**, we found two new problems. First, the specifications need to be revised due to the number of problems with the hardware. Second, the factory in China has some issues with Quality control. Therefore, we will visit China next week for an inspection of the factory line.
- **To add to that**, our vendors in China have promised to send us the new part by the end of next week. We believe this new part will make our product better. In addition, this new part is not really expensive compared to the old part. So, that is one merit of the new part from China.
